Sitting on Backapp chair

with your feet on the footplate you will:

Standing on Backapp 360

you will:

backapp

Backapp Smart

On Backapp Smart you sit tilting in all directions with your feet on a footplate padded with a soft damping material.

By turning the ball up or down you easily adjust the tilting movement.

The sitting position and the gentle motion ensure a wonderful sitting experience both with and without wheels.

The Backapp chair and the Backapp 360 balance board utilize the patented Backapp technology. A comfortable 360 degree tilting movement is achieved by the body balancing on the centrally positioned Backapp Ball surrounded by a soft ring-shaped damping cushion.

Backapp Hipp

Backapp Hipp has the same unique Backapp technology as the premium model Backapp Smart. The Backapp health effect available to everyone!

Backapp 360

Balancing on Backapp 360 you are tilting in all directions.

By turning the red knob in either direction you easily adjust the tilting movement.

The soft ring shaped damping device makes the tilting experience comfortable for all users.
